- Start Bee Flogger
- Create an unnamed document simply containing the letter "a"
- Click on the FTP button on the toolbar
- Try to ftp to your server

BUG: Observe; the ftp server is no longer responding. Indeed ps -augx shows that it is not even running and there is a core dump in /.

EXPECTED: No crash

Not our code, Jill, that's just proftpd which comes with Linux.

🏷️ **ayodele-olufemi** added the `wontfix` label 6 minutes ago

ashepherd6516 commented 6 minutes ago   Author

That doesn't sound right. I've never been able to crash proftpd when I connect with a normal ftp client. Our code crashes it every single time. Ftp servers don't just "crash".

I think I was passing th user name instead of the password or somthing...

ashepherd6516 commented 4 minutes ago   Author

It still is happening in build 2021

AnthonyEckman commented 3 minutes ago   Collaborator

Whoa. That's strange, Lemme debug this.

AnthonyEckman commented 2 minutes ago   Collaborator

I'm Thinking it might be MikeyStrCpy()....

AnthonyEckman commented 2 minutes ago   Collaborator

Ahhhhh! FIXED!

ashepherd6516 commented 1 minute ago   Author Collaborator

Very good
